Introduction of a new line of XPT
and HPT mechanical anchors

- Since 1911, when John Rawlings invented and filed an application to patent the world's first wall plug, the history of fixings has been inextricably linked with the RAWLPLUG® brand. Following the tremendous success of this revolutionary product in Europe, the RAWLPLUG company was founded in 1919 and quickly became renowned across the world for its innovative and reliable fixings.

Over the years, a small family company became an international organisation whose power is reflected in **13 companies** on four continents, over **1.900 employees** and almost **30.000 lines**, making up our diverse range of products. The Group's present-day know-how is a synergy of knowledge and experience based on the best practices of its subsidiaries whose main activity is developing innovative solutions in the field of fixing technologies, including their **design, production and distribution**.

Since it was founded, Rawlplug has placed great emphasis on the **quality and innovation** of its products, developing research centres in Glasgow, Wrocław and Lancut. R&D teams consisting of experienced engineers, in the quest to find innovative solutions, design products intended for a wide range of substrates and applications. Pioneering Rawlplug solutions, imitated all over the world, have been defining the direction for the entire fixings industry for over 100 years.

- Nowadays Rawlplug's® products are used in construction, automotive, machine and electro-machine, mining, shipyard, road, timber and power industries, including around 30.000 product listings divided into 3 key groups:

Fixings & Anchors

Thermal insulation fixings for facades and roofs, self-drilling screws, lightweight & domestic fixings, frame fixings, medium & heavy-duty anchors, resin-bonded anchors and many others.

Fasteners

DIN bolts, nuts & washers, special bolts and many others (including bespoke solutions).

Tools

Hand & power tools, power tool accessories (drills, saws, chisels, etc.) and direct fastening systems.

Today Rawlplug continues in its fine tradition of innovation through constant research and development of technologies and processes that minimise the company's impact on the natural environment, making sustainable development one of the pillars of its existence.

Sustainable Rawlplug:

- employs a strategy of successful management and ethical business practices;
- builds long-lasting relationships based on common respect and trust with customers, suppliers and business partners thanks to an effectively designed and operated supply chain;
- cares for its employees and provides help and support to develop local communities;
- is concerned for the natural environment, focusing on areas involving production processes, employee education and cooperation with experts in the field of waste management.

Thanks to its constant emphasis on innovative solutions and customer care together with keen concern over sustainable development and environmental issues, RAWLPLUG'S® products continue to be acknowledged around the globe making them a world-class, first choice for the fixings industry.

Sustainable **RAWLPLUG**

The Rawlplug Direct fastening systems are designed and developed as a result of continuous market analysis and collaboration from the construction and industrial sectors.

We strive to provide solutions for fixing requirements, and endeavour to introduce high quality innovative products to our customers.

Our range of tools and consumables are manufactured with the very latest technology and conform to the highest stringent measurements of tolerance and performance

On the 31st July 2013, the gas powered tools from Rawlplug were awarded TÜV certification according to the machinery directive 2006/42/EC, annex 1 EN792-13: 2000+A1:2008.

Certificates are awarded to products that have been successful in passing a number of tests carried out by TÜV Rheinland for quality and safety.

The tools and components will be subjected to regular monitoring to ensure that the product continues to meet the high standards.

RAWLPLUG GAS POWERED TOOLS

IF YOU HAVE A REQUIREMENT FOR FIXING TIMBER TO TIMBER, RAWLPLUG HAS A RANGE OF PROFESSIONAL TOOLS FOR THE JOB.

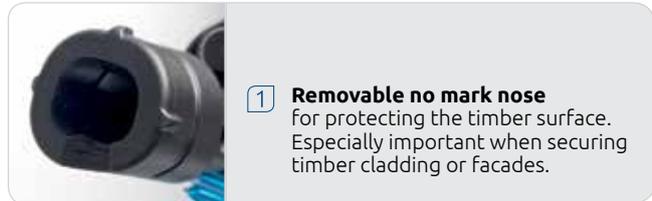

The WW90CH is a gas powered framing nailer for using clipped head nails. The tool will function with plain or ring shank nails ranging from 50 to 90 mm in length. It has a magazine capacity of 60 nails and features a quick loading mechanism and clip to prevent nails from dropping out when reloading.

A precision secure fixing is established by using the key less depth adjuster. For second fix applications such as tongue and groove panelling, beading and architraves, Rawlplug have the option of a straight or angled magazine gas powered tool. The A2064 is an angled brad nailer that functions with a 32 to 64 mm nail, whilst the B1664 is a straight brad nailer with a range from a 19 to 64 mm. Both version of brad nails are a size 16 gauge. The tools share the same power unit and key less depth of drive adjustment. The magazine has a capacity of 100 brad nails and features a quick release mechanism for clearing any obstructions. A new addition to the Rawlplug portfolio is a gas powered positive placement nailer. The GMC38 will function with a nail range of 35 to 60 mm. The tool is capable of using both paper or plastic collated nails with a full round head.

Gas powered nailer for timber

Features and benefits

TÜV certified

1 Removable no mark nose
for protecting the timber surface. Especially important when securing timber cladding or facades.

2 Key less depth adjustment
The operator can easily adjust the depth that the fixing is driven into the timber to produce a precise and secure fixing.

3 Retractable rafter hook
ensures safe storage of the tool when not in use. Can also be hung from a tool belt for complete maneuverability.

4 Metal magazine
Quick and simple to load due to the one handed operational feeder spring. A safety clip at the rear prevents the nails from falling out and ensures safe reloading

R-KIT-WW90/SC40
Gas tools cleaning kit - debre cleaner, lubricating oil, spare air filter and o-ring, cloth and instruction of cleaning procedure. The kit is not included with the tool.

Applications

Timber frame stud work
Roof battens
Cladding and panelling
Floor boarding
Fencing
Decking

PNEUMATIC TOOLS

COIL NAILERS, STRIP NAILERS, ROOFING NAILER, POSITIVE PLACEMENT NAILER, STEEL AND CONCRETE NAILER

The wide range of Rawlplug pneumatic nailer's have been designed and manufactured to the highest standards. We are constantly focused on delivering performance tools that can be used in the construction industry. All of our tools are CE certified.

Pneumatic nailers for timber

Features and benefits

- ✓ **Adjustable exhaust port** An important safety feature when operating in areas where other persons may be affected by the exhausted air and particles
- ✓ **Key less depth adjustment** the operator can easily alter the depth that the fixing is driven into the timber to produce a precise and secure fixing.
- ✓ **Removable no mark nose** for protecting the timber surface. Especially important when securing timber cladding or facades.
- ✓ **Up to 10% more powerful than gas equivalent.** Power ensures outstanding performance in all applications and timber types.
- ✓ **Magazine capacity of 88 nails** reducing the frequency for reloading thus increasing performance and speed of operation.
- ✓ **Simplicity of tool design** ensures low maintenance and high reliability.

Applications

Timber frame stud work
Roof battens
Cladding and panelling
Floor boarding
Fencing
Decking

Pneumatic roofing nailer for timber

Features and benefits

- ✓ **Key less depth adjustment**
The operator can easily adjust the depth that the fixing is driven into the timber to produce a precise and secure fixing.
- ✓ **Very low recoil value** provides great improvement in operators comfort of using the tool.
- ✓ **Ergonomic design** and balance improves the comfort for the operator and reduces the risk of injury.
- ✓ **Lightweight and maneuverable**
safe and ideal for roofing applications
- ✓ **Nail cover ensures** great level of safety while operating this type of tool. All moving nails are separated from involuntary access.
- ✓ **Guide plate** to ensure that the fixing is 90 degrees to the application.

Applications

Felt roofing
Fixing breather membranes

RAWLPLUG COMPRESSORS

The Rawlplug compressor range was meticulously developed to align with our pneumatic tools.

Our compressors are designed for both DIY and semi-professional use. All models benefit from easy-start motors, simple to adjust regulators, quick-release air coupling and readily accessible drain valves.

Using the highest quality parts in the manufacture of each unit ensures our equipment is powerful, compact and extremely reliable and efficient

Oil lubricated compressor

Features and benefits

- 1 **Brush less motor ensures great performance and durability.** Brush less technology is the most reliable drive type used in power tools and mobile equipment providing low damage risk and maintenance cost.
- 2 **Oil lubricated pump ensures faultless** operation and great heat distribution. Thanks to this technology the device is one of the most reliable on the marketplace.
- 3 **Fully automatic on/off control switch for best performance.** It secures stability of parameters especially important when operating tools that are sensitive to changes of pressure.
- 4 **Intake filter built in to protect damage** that can be caused during transportation and storage. This special design prevents this type of damage and reduces service cost.
- 5 **Robust wheels and double front foot** for good stability. Both features ensure solid working position of the device and prevent from tipping over.

Oil less compressor

Features and benefits

- ✓ **Brushless motor** ensures great performance and durability. Brushless technology is the most reliable drive type used in power tools and mobile equipment providing low damage risk and maintenance cost.
- ✓ **Oil less pump ensures outstanding** performance in any working conditions. Thanks to the oil less solution the device is able to work in any place and in any position. It is also safe to transport providing lack of leaking and environmental hazard.
- ✓ **Extremely light and portable.** Low weight and compact design allows for using the device in most inaccessible areas comfortably and with providing high level of safety.
- ✓ **Quiet and efficient.** Conforms to the highest standards of noise emissions delivering clean and dry compressed air up to 8 bar.

RAWLPLUG NAILS

Our goal is to supply high quality products which will satisfy investors and broaden the confidence that is associated with the Rawlplug brand. We are constantly conducting technical studies and tests in order to align our products in accordance and exceeding industry and European standards. Our salt spray test ensures that a high anti corrosive protection is applied to our nails. Load bearing and pull out performance is measured with the latest apparatus in the industry. As a result of constant investment in our production facility we are expanding our business throughout the world.

WW90CH paper collated nails for timber

Features and benefits

- ✓ **34° angle collation with a clipped head** ensures the nail is compatible with all leading manufactures tools
- ✓ **Special coating at the base of the shank** improves the drive of the nail and ensures a secure fixing
- ✓ **Waxed paper collation** avoids deterioration in wet conditions

Applications

Timber frame stud work

Associated products

Based on the idea of sustainable development, we are implementing innovative products of a high standard, while taking due care of the environment, society and economy. Sustainable RAWLPLUG is a company that cares for the environment and by using the latest technology created a New System of Packaging and Labels. The project was preceded by an audit of selected product groups, representing 80% of sales.

In order to develop a logical system we had to investigate in great detail the processes associated with the manufacturing, packaging, storage and transportation of our products and then adapt the dimensions to maximise the quantity of items on a pallet and storage spaces. As a result, our new packaging has contributed to reducing the amount of shipments by eliminating empty spaces in mismatched cartons or incomplete pallets.

SC40 plastic collated pins for steel and concrete

Features and benefits

1 **Ballistic point increases performance into the base material.**
This special design is responsible for providing best load bearing values for this type of fixing.

2 **Plastic collation** prevents the strips from deterioration in wet weather or high humidity conditions.

✓ **Full round head** for a secure fixing with the highest performance achieved.

Applications

Cable clamps
Cable conduits and wires
Cable trays
Drywall structures

WW90CH, SC40, A2064, B1664 fuel cells

Features and benefits

- ✓ **The fuel cell** is a liquified gas under pressure - colourless with a slight odour. Rawlplug fuel cells contain a high grade Propane/ Butane fuel mixture - which leaves little carbon residue in the tool.
- ✓ **The fuel** also has a fully synthetic oil as a lubricant - increasing the time between servicing.
- ✓ **Fuel cell** functions down to -5° Celsius and up to a maximum of 35° Celsius

Applications

Propelling gas powered tools

A2064 and B1664 brad nails

Features and benefits

- 1 **Chisel point to prevent the timber from splitting.**
Most important while installing delicate and carefully made interior elements.
- 2 **T type head provides concealed fixing.**
Especially important when securing unprotected timber elements.
- ✓ **Transparent glue collation** for a stain less fixing.
Special glue collation leaves no residue in the tool or work area and most importantly prevents from damaging secured elements.

Applications

Tongue and groove panelling
Dado rail
Skirting boards
Beading
Architraves

PN-3490 paper collated nails for timber

Features and benefits

- 1 **The nail conforms to what is proven a market standard** which makes it first choice product even for users of competitive tools.
- 2 **Carefully developed solution** that makes our nail not only easy to drive but also extremely resistant to pull out forces.
- 3 **Nails are being used** mostly outdoors which is critical for the product to be resistant to all weather condition that may affect its performance.

Applications

Timber frame stud work

Associated products

GMC38 and PMC38 paper collated metal connector nails

Features and benefits

- 1 **34° angle paper collation** ensures the nail is compatible with all leading manufactures tools
- 2 **Twisted shank** eases driving the nail into timber
- 3 **Waxed paper collation** avoids deterioration in wet conditions

Applications

Fixing metal timber connectors
Truss plates
Strapping

PN-57, PN70 and PN-83 wire collated nails for timber

Features and benefits

- 1 **16° angle collation** ensures the nail is compatible with all leading manufacturers tools
- 2 **Full round head** provides a secure fixing
- 3 **Diamond point** prevents the timber from splitting

Applications
Wooden pallets and packaging
Cladding and panelling
Decking
Fencing

RAWLPLUG PROFESSIONAL STAPLERS

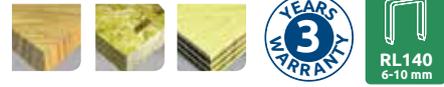

Designed specifically for industrial applications, the Rawlplug professional hand stapling tool offers a solution for securing foils, linings and breather membranes.

Heavy duty stapling is possible due to the metal body construction. The easy grip handle is ergonomic and intended for one handed operation.

Rawlplug staples are manufactured to the highest standards and are subjected to regular testing to ensure their strength and rust protection

Heavy duty hammer tacker

Features and benefits

- 1 **Loading magazine with lock**
easy access staple insertion
- 2 **Steel housing**
resists mechanical damage
- 3 **Staple window**
easy view if stapler is loaded
- 4 **Type, range**
staples 6-10 mm

RAWLPLUG REBAR TIER

The Rawlplug rebar tier is an effective alternative to manual wire binding, which is traditionally a monotonous and stressful task. The ergonomic rebar tier not only improves working conditions, it is also an economic and reliable solution, which helps to solve tasks far more effectively.

Rebar tying

Features and benefits

- ✓ **Increases job efficiency** by reducing tying time. Labour cost is one of the most crucial factors in construction industry. Rawlplug rebar tier allows to minimize the cost related to reinforcing concrete by reducing time needed to make steel structures. Skilled operator can do up to 25 000 ties per day!
- ✓ **Reduces risk of health problems** Thanks to carefully designed and balanced construction the tool has no influence on operators fatigue.
- ✓ **Brushless motor ensures great performance and durability.** Brushless technology is the most reliable drive type used in power tools and mobile equipment providing low damage risk and maintenance cost. In addition to Li-Ion battery packs it provides end user with great combination to achieve best performance standards.

More from Rawlplug

Efficacy in the hardest conditions

We are proud to present innovative fixing from the **Bonded Anchors and Mechanical Anchors** group designed for the heavy loads demanded by industrial construction. Among our products you will find unique solutions to enable you to achieve maximal amounts with any kind of substrate. Knowledge backed-up with experience guarantees the effectiveness of our fixings and the success of your investment.

Durability and versatility

Our wide range of expansion plugs made of synthetic materials and metal, for low and medium loads, have been used for years for both industrial and residential construction. Incredibly durable FF1 from frame fixings group, universal in use 4ALL and UNO Plug, no. 1 on the UK market, are leading products of RAWLPLUG®'s offer in the field of **Lightweight Fixings**, designed with every substrate in mind.

Innovations in Energy Saving construction

As a leading producer of façade insulation fixings we would like to present to you our wide array of products used in energy saving constructions. The Reliability and simplicity of our solutions combined with their ease of installation make them the most popular and desired by professionals. We invite you to familiarize yourselves with our offer for **Façade Insulations Fixings**.

Excellent resistance for high loads

Thanks to our close cooperation with roof covering product producers, and our insight into the needs of investment contractors, our **Roofing Insulations Fixings** are one of the most popular among European roof fixing system producers. We invite cooperation from engineers, architects, and roof works contractors. And encourage you to try out our calculation software "ROOFIX" today.

Safety Certificate

Stepping towards the needs of customers, and increasing the general level of safety in closed spaces, we have created a protection system event of which in the combustion prevents fire and smoke from spreading. We invite you to acquaint with our offer for **Passive Fire Protection Systems**, which hold the European Conformity Assessment.

Guarantee of lasting quality

Thanks to our constant monitoring of the production of assortments from our **Sealants and Adhesives** range we guarantee the constant and repeatable quality of our products. Their wide range of application possibilities and high efficiency has enabled us to rank among the top 5 of companies in the construction chemistry industry for years.

Maximal weather resistance

Rawlplug® **Fasteners** guarantee reliability of connections and maximal weather resistance. Our products, thanks to the use of appropriate materials and adoption of modern anticorrosion coating, pass even the hardest tests, matching the expectations of the most demanding clients. In our rich offer of screws characterized by extraordinary ease of installation, one may find perfect kind of connection for any kind of material and substrate.

Save time and minimize costs

In our offer of **Direct Fastening Systems** you may find, among others, highly effective pneumatically and gas powered nailers with accessories, compressors and an innovative and ergonomic rebar tier. We invite you to familiarize yourselves with the capabilities of Rawlplug® tools, which can significantly increase the comfort and effectiveness of work at any construction site.

Maximal effect of optimal offer

In order to ease the application and proper use and installation of our products, we supplement the our assortment of fixings with a precisely composed offer of **Power Tool Accessories**. They include, among others, European-made drills of the highest quality, as confirmed with a Sichersafe certificate. We invite you to familiarize yourselves with our offer of accessories for professional installation techniques of the Rawlplug® brand.

Unique and exclusive exposition

Rawlplug **POS Essential Offer** it is a unique and complete solution designed for product exposition in building wholesale and retail stores. The POS system is based on easily configurable rack components enhanced with expansive information elements and additional decorations, as well as a combination of individual packages in form of innovative Rawlplug Bag and cutting-edge cardboard boxes.
